## PROFILE

I enjoy working with a team, with ample experience doing so in various environments (work office, non profit organizations), as well as having the needed initiative and motivation to work individually. I also have facility in public speaking, with experience performing several presentations at events and for customers.

With a high value of responsibility, I like to commit to the tasks until completed with constant dedication. Always willing and open to learn, investigate and innovate.

## EXPERIENCE

### Software Design & Development, Sequel Business Solutions

2007-present

Designing, coding and support of complete solutions for Brokers and Underwriters of the London Lloyd's Insurance Market. Realizing programming in all areas of the two main suites of applications Sequel Business Solutions provides, Eclipse Broking and Eclipse Underwriting, involving all layers from User Interface to data manipulation, using along the way C#, Visual Basic and SQL Server.

Worked at the London office of the company from March 2008 to June 2008, giving during that period support directly on site to Brit Insurance Holdings, one of the main clients of Sequel Business Solutions, developing improvements to the Eclipse Underwriting platform currently deployed to them.

### Programming and research and development, Beon Networks/Genera

2007

Programming and implementation of complete software solutions for the Windows desktop environment, as well as the development and maintenance of web applications, from February to December of 2007.

Achievements:

Widgets developed with C# using the .NET 2.0 framework for the Windows desktop environment: Twitter-box (that operates using the new twitter.com web application using their API), Moviebox, etc.

Development using ASP .NET, MySQL and Javascript of the web [www.beon4u.com](http://www.beon4u.com)

Development using PHP, AJAX and MySQL of the social web [www.balonsexta.com](http://www.balonsexta.com) made for the Spanish national TV channel laSexta to cover the 2007 European Basketball Championship.

### Technical Support, GoldenMac

2005

Realized work as technical support of Macintosh computers at GoldenMac Málaga from April to October of the year 2005, also doing hardware repairs, consultancy, commercial work and presentations of new software and hardware.

### Developer, Growl

2004-2005

Source code contributor for the system notification open source software Growl for the Mac OS X environment, member of the founder team. Most coding is done using Objective-C under the Cocoa framework. More info at [www.growl.info](http://www.growl.info)

### Developer, Adium X

2003-2005

Source code contributor for the open source instant messaging application Adium for Mac OS X, realizing most work in the user interface, bug fixing and optimization areas using Objective-C under the Cocoa framework. More info at [www.adiumx.com](http://www.adiumx.com)

### Regular guest, Podquerón podcast

Regular guest in the podcast Podquerón, a web-based audio broadcast distributed over the Internet via an RSS feed that covers news around the Mac world, latest computer technologies and digital entertainment. More info at [www.gummalaga.com](http://www.gummalaga.com) (in Spanish).

### Organization, Grupo de usuarios de Macintosh de Málaga y la Costa del Sol

2005-present

Member of the organization of the Macintosh User Group of Málaga and the Sun Coast (GUM Málaga), collaborating in the realization of events and maintenance and supervising of the communication channels (mailing list, web forum). More info at [www.gummalaga.com](http://www.gummalaga.com) (in Spanish).

**Ambassador, Grupo de usuarios de Macintosh de Málaga y la Costa del Sol**

**2000-2005**

Founder and ambassador of the first Macintosh User Group of Málaga and the Sun Coast. Realizing event organization, maintenance of the communication channels and resource management.
